

Free Epson iProjection app for Google Chromebook

The power to share, the freedom to learn

Thanks to its great performance and low price point, the Google Chromebook is fast becoming the favoured learning device for students and educators worldwide. Now it's time to free your students' learning beyond the screen with the Epson iProjection app for Google Chromebook.

No wires, no fees, no fuss – the free app offers simple and accessible screen-mirroring for all Chromebook devices on supported Epson projectors.

No wires, no fees, no fuss

We understand how important flexibility and accessibility is in today's learning environments, which is why we've developed this app to be as simple and intuitive as possible.

With an Epson projector and the Epson iProjection app for Google Chromebook, students and teachers can share content quickly and easily from their Chromebook to the main classroom display. Projecting wirelessly gives the teacher the freedom to move around the class, and unlike other apps on the market, it's completely free, ensuring access for all pupils.

Whether you're teaching a full class or delivering an important presentation, Epson iProjection app for Google Chromebook lets all connected devices mirror screens through any compatible Epson projector, including the EB-500 Series, EB-600 Series and EB-9 Series.

How it works

Share content quickly and clearly in just a few steps. With the Epson iProjection app for Google Chromebook, you can quickly connect and focus on helping your students share, collaborate and learn. Simply download and install the Epson iProjection app for Chromebooks from the Chrome Web Store, then follow the instructions below.

1

Click the Launcher icon on your Chromebook display and click the **Epson iProjection** icon.

2

Enter your projector's IP address in the search box and click **Search**.

3

Select your projector from the list that appears and click **Join**.

4

Select the Chromebook display that you want to project and click **Share**. Your Chromebook's display is now mirrored by the projector. Anything that you do on your Chromebook is also shown by your projector.

When you're done, click the Epson iProjection icon in the app shelf at the bottom of your Chromebook display, click **Leave**, and then click **Yes** to end the session and stop mirroring your Chromebook display.

Note: Make sure that both your Chromebook and Epson projector are connected to the same network.

If you don't know your projector's IP address, press the **LAN** button or the **Home** button on the projector's remote control to display it.
